-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Group I in the reply filed on 1/20/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-6 and 8-24 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed method consists solely of the manipulation of an abstract idea and is not concrete or tangible. See *In re Warmerdam*, 33 F.3d 1354, 1360, 31 USPQ2d 1754, 1759 (Fed. Cir. 1994). See also *Schrader*, 22 F.3d at 295, 30 USPQ2d at 1459. In addition, the claim is devoid of any limitation to a practical application in the technological arts. The invention in the **body** of the claim must recite technology. If the invention, in the body of the claim, is not tied to technological art, environment, or machine, the claim is not statutory (see

Art Unit: 3624

Ex parte Bowman, 61 USPQ2d 1665, 1671 (BD. Pat. App. & Inter. 2001). Also note MPEP 2106 IV 2(b). Examiner notes that this is not a precedential decision but it is being cited for its analysis of whether the claim is in the technological arts.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Specifically, the metes and bounds of the claim are unclear due to the vague use of the term “offers” to have more than one meaning. For example, there are “improvable offers” “initial offers” “other offers” “nonimprovable offers” all appearing to be interchangeable at times within the different claims. The claims are being examined accordingly. Applicant should clarify the invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this

Art Unit: 3624

subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Van Horn et al. (US6631356B1).

Specifically as to claims 1 and 16, Van Horn et al. disclose a method for processing offers intended to be associated with offers with specifications for conditions for acceptance by; receiving a plurality of offers, associating offers with offers; receiving a plurality of offers, determining which offers have more favorable specification ; and associating offers with offers (see figs. 1-3, col. 1, lines 20-55, col. 7, lines 1-65, cols 11-15).

Specifically as to claims 2-15 and 17-24, see above recitations in above rejection for claims 1 and 16.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Micali (US005615269A) discloses ideal electronic negotiations. Guenther et al. (US006119052A) disclose a market-based control system for controlling object motion with smart matter. Conklin et al. (US006141653A) disclose a system for interactive multivariate negotiations over a network. Rosen (US006205436B1) discloses trusted agents for open electronic commerce where the transfer of electronic merchandise or electronic money is provisional until the transaction is finalized. Holland et al. (US 20020143605A1) disclose a method and apparatus for managing supply and demand in a structured environment. Kanebsky et al. (US006480861B1) disclose distributed adaptive computing. Ojha et al. (US006598026B1) disclose methods and apparatus for brokering transactions. Anderson et al. (US006671674B1)

Art Unit: 3624

disclose computer-based auction and sale system. Force (US006704716B1) discloses a method and system for conducting an online transaction that allows the seller and bidder to negotiate.
